

Miscellaneous

Micro Maglock

The RISCO Micro Maglock has been updated by the supplier.

Instead of having just RED and BLACK wires, they now have RED, BLACK, WHITE and BLUE wires. The extra BLUE and WHITE wires are for a '24Volt Option' if required.

12V Use:

Connect RED and BLACK together – This pair is Positive +12V

Connect BLUE and WHITE together – This pair is negative 0V

24V Use:

RED = Positive +24V

WHITE = Negative 0V

Connect BLUE and BLACK together and tape up.
