

Phil Wring

Personal Profile

Welcome to my personal section of the RISCO Group's UK website. I am a Business Development Manager of Integrated Systems for RISCO Group.

Throughout my career I have succeeded in building a great rapport with companies and my personal aim is to continue to build strong and lasting relationships with end users, architects and consultants, to whom I will be dedicating my time to introduce RISCO's SynopSYS software platform.

My background is of a similar nature with other manufacturing companies and my last employment prior to joining RISCO Group was with JVC Professional, where I gained significant experience to be able to drive this section of RISCO's portfolio.

My hobbies include scuba diving and golf and I am sure this sport will give me plenty of opportunities to meet up with clients.
