For the attention of Tony Binch

Re Risco Prosys 128

Dear Tony

Having fitted our first Prosys 128, I would like to congratulate Risco Group on having produced one of the finest G3 intruder alarm panels currently available. A well layed out panel with an abundance of expansion & communication modules available. The ability to install detectors on the 485 bus is nothing short of brilliant, the first significant advance in intruder alarms since the LCD RKP. The one issue we did have with the Prosys was the Rkp, for lack of a better description "Butt Ugly", still, you can't have it all. A trouble free installation - I would recommend the Prosys to everyone.

Yours faithfully

Rik Pieniazek
